SUMMARY

Frontend-focused full-stack developer with 4+ years of commercial experience building SPA/SSR applications, e-commerce and internal enterprise systems on Vue 3 / Nuxt. Led a frontend team of up to 5 developers. I work AI-first every day (Claude Code, Cursor) and build LLM-powered assistants on Node.js: job-matching pipelines, structured-output prompting, browser automation with Playwright. My core stack is Vue and Node.js; with AI coding tools I deliver in other stacks as well.

EXPERIENCE

Frontend Developer — ElService LLC (e-commerce) Jan 2026 – May 2026

- Built an online store web app from scratch on Vue / Nuxt 4: catalog, cart, checkout; component architecture, Pinia, REST API.
- Maintained and extended a legacy e-commerce codebase: new features, bug fixes, refactoring.
- Developed a Telegram Mini App integrated with the backend via REST API.
- Integrated payments (YooKassa, CDEK Pay — webhooks, payment statuses), maps and logistics (Yandex Maps, CDEK pickup points and delivery cost).
- Store theming system, responsive layout; Docker, Nginx and environment deployment.

Nuxt 4 · Vue 3 · Pinia · REST API · Telegram Mini Apps · Docker · Nginx

Frontend Developer / Team Lead — VSL (web studio) Oct 2022 – Dec 2025

- Led a frontend team of up to 5 developers: architecture, code review, mentoring, task planning.
- Delivered commercial SPA/SSR projects end to end — from client communication and business logic to build and deployment.
- SEO and performance: Lighthouse / PageSpeed and Core Web Vitals improvements, code splitting, bundle and image optimization.
- Authentication (JWT, OAuth), middleware, admin panels.
- Integrations: payments, Yandex Maps, OpenStreetMap, Yandex Metrica, Google Analytics, EmailJS, third-party APIs.

Vue 3 · Nuxt · Vite · JWT · OAuth · Figma · Docker · Nginx

Frontend Developer — KONAR (industrial manufacturer) Oct 2023 – Apr 2025

- Built interfaces of corporate SPA/SSR web applications and admin systems in an Agile team (sprints, stand-ups).
- Real-time client–server communication via REST API and WebSocket.
- Authentication and access-control modules, internal microservices; bundle optimization, Docker and Nginx infrastructure.

Vue 3 · SPA / SSR · REST API · WebSocket · Docker · Nginx

Freelance Web Developer Jul 2020 – Nov 2020

- Pixel-perfect landing pages from Figma: responsive, cross-browser; worked directly with clients.

AI PROJECTS (OWN, USED DAILY)

- **Job-matching assistant for hh.ru** — an LLM (Groq: Qwen, GPT-OSS) scores vacancies against my profile and writes cover letters; results go to a Telegram bot with inline actions. Node.js, Fastify, PostgreSQL, Prisma, Docker.
- **Telegram channel parser** — reads channels via Telegram API, keyword pre-filtering, LLM scoring and reply drafting, sending through Telegram Web automated with Playwright.
- **Auto-apply assistants** for job boards and a Kwork order monitor — Playwright browser automation plus LLM evaluation.
- Prompt engineering: system prompts with JSON output, response validation, retries, model switching on rate limits; OpenAI-compatible APIs (Groq, OpenRouter) and Claude.

SKILLS

Frontend	Vue 3, Nuxt 3/4, Composition API, Pinia, Vue Router, JavaScript (ES6+), TypeScript, Vite, HTML, CSS/Sass, SSR/SSG, i18n
Backend	Node.js, Fastify, PostgreSQL, MySQL, Prisma, REST API, WebSocket
AI	LLM APIs, prompt engineering, structured outputs, AI agents and automations, Claude Code, Cursor
Tooling	Git, Docker, Docker Compose, Nginx, CI/CD, Playwright, Figma
Languages	Russian — native; English — conversational
